

THE PEDAGOGICAL POTENTIAL OF CRAFTWORK

craft as a tool for human education and development

Mon 13 - Thurs 16 July 2020, Ruskin Mill Trust sites

This intensive craft course combines theory with practice, inviting participants to undertake craft activities and practical skills, and to reflect on their lived experience through action research.

The course works with Ruskin Mill Trust's method of *Practical Skills Therapeutic Education* and is underpinned by Rudolf Steiner's pedagogy. It is aimed at individuals wishing to work within a therapeutic and educational context.
